terminal side

2. There should be continuity between the A and B terminals when the seat belt is not buckled.
There should be no continuity when the seat belt is buckled.

Chime Test

1. Remove the left side kick panel and disconnect the 2-P connector from the main wire harness.

2. Test the chime by connecting battery power to the ORN terminal and ground to the BLK terminal, and cycling the power on-off repeatedly.

3. If the chime fails to sound every time power is cycled, replace it.
